Re: A Chery Tiggo Cross fleet for BCI Security *from business relationship to fleet partnership.*

Dear *[Name]*,

BCI Security and CMH Westrand already do business together, and it has been a relationship worth having. I am writing to propose taking it a step further: a dedicated vehicle fleet, built around your operation and carried by one dealer team that knows it well.

The enclosed proposal sets out **fifteen Chery Tiggo Cross, delivered in full BCI livery** and ready for duty on handover. It is a vehicle chosen for the unglamorous things a security fleet lives on: reliability on high mileage, low running cost, the presence your brand deserves on site, and a warranty that protects you for years rather than months.

You will notice there are no prices in this version, and that is deliberate. I would rather we first agree that this is the right vehicle and the right partnership, then put firm, transparent figures to whichever ownership route suits BCI best. Nothing is fixed until you are happy with it.

The next step is simple. Let me bring a demonstration unit to your team and walk through how the fleet fits your operation and where BCI is headed. There is no obligation. Name a day and I will be there.

Warm regards,

Innocent Mariti
