Re: A Chery Tiggo Cross fleet for BCI Security *from business relationship to fleet partnership.*

Dear Jaco, Johnny and the BCI team,

BCI Security and CMH Westrand already have an established business relationship. I am writing to explore how we can take that relationship a step further through a dedicated vehicle fleet solution, supported by one dealer team from vehicle selection and delivery through to ongoing servicing requirements, and built around BCI's operational requirements.

The enclosed proposal outlines a potential fleet of **15 Chery Tiggo Cross vehicles**, configured for BCI Security and presented in BCI livery. The final vehicle specification, livery, equipment and delivery programme would be confirmed with BCI before order.

The Tiggo Cross offers the combination of automatic transmission, SUV practicality, fuel efficiency, safety and long-term warranty coverage that can make it suitable for day-to-day fleet operations. The BCI livery also gives the fleet a consistent and professional presence across your operational footprint.

This initial proposal does not include pricing deliberately. Before preparing a formal quotation, I would prefer to understand BCI's preferred ownership structure, operational requirements and fleet priorities. Once those requirements are confirmed, we can prepare transparent figures around the preferred ownership route. Nothing is committed until the final specification and commercial terms have been agreed.

The next step is simple: let me bring a demonstration unit to your team and discuss how the Tiggo Cross could fit BCI's current fleet requirements. From there, we can work through vehicle specification, livery, ownership structure and commercial options. There is no obligation at this stage. If the concept makes sense for BCI, we can then move towards a formal fleet quotation.

Warm regards,

Innocent Mariti

- ✓ Cruise control, Bluetooth, LED headlamps
- ✓ Keyless entry & start, leatherette, air-con

DIMENSIONS & OWNERSHIP COVER

- ✓ 4 320 × 1 831 × 1 652 mm, 380 L boot, 5 seats
- ✓ Vehicle warranty 5 years / 150 000 km
- ✓ Engine warranty 10 years / 1 000 000 km
- ✓ Service plan 3 years / 45 000 km

Warranty and service plan subject to Chery South Africa terms and conditions.

Professional presence

A consistent branded fleet creates a recognisable and professional BCI presence across operational locations.

Fuel-conscious operation

The 1.5-litre petrol engine and CVT automatic transmission are designed to support practical day-to-day operating costs.

Warranty support

A 5-year / 150 000 km vehicle warranty provides long-term coverage for the fleet, subject to the applicable warranty terms.

Vehicle specifications based on Chery South Africa information available at the time of preparation. Final specification, availability and applicable terms to be confirmed at quotation / order stage.

BUILT AROUND BCI'S REQUIREMENTS

A fleet shaped for BCI, not a generic brochure.

The outline below is the starting point for the conversation. Every line is proposed, not presumed, and is confirmed with your team before anything is ordered.

PROPOSED FLEET	15 vehicles
VEHICLE	Chery Tiggo Cross 1.5 LiT CVT
APPLICATION	Security operations / fleet mobility
BRANDING	BCI Security livery
VEHICLE IDENTIFICATION	Unit numbering / fleet identifiers as required
OWNERSHIP	To be determined with BCI
DELIVERY	Coordinated vehicle preparation and handover

Every specification, livery detail and ownership decision in this proposal is a proposal, not a presumption. BCI confirms each one before order.

OWNERSHIP, YOUR WAY

Three potential ownership structures.

The fleet can be structured around BCI's cash flow and how you prefer to hold your assets. Firm figures follow once the preferred route and requirements are confirmed.

Cash purchase

Outright ownership from day one, with no vehicle finance interest cost. Suitable where BCI prefers to acquire and hold the vehicles directly.

Instalment sale

Spread the vehicle cost over an agreed finance term, subject to credit approval and applicable finance terms. Ownership transfers to BCI in accordance with the finance agreement.

Full-maintenance lease

A structured monthly payment that can incorporate agreed maintenance and operating costs, subject to the selected lease provider and contract terms. This can provide greater predictability for fleet budgeting.

No pricing appears in this proposal by design. We prepare transparent figures around the ownership route BCI prefers, once that route is agreed.

WHAT BCI CAN EXPECT FROM CMH WESTRAND

One dealer team, across the whole fleet.

1

One fleet contact

A dedicated point of contact to coordinate vehicle enquiries, orders and servicing requirements.

2

Planned fleet support

Where practical, servicing can be coordinated and staggered to help minimise disruption to BCI's operations.

3

Coordinated delivery

Vehicle preparation, livery, licensing and handover can be coordinated as part of the delivery process, with timing confirmed before order.

4

Clear documentation

Vehicle specification, pricing, finance structure, livery requirements and applicable terms will be documented before commitment.

The intention is simple: one accountable team from the first enquiry through to ongoing servicing, so the fleet is never passed from desk to desk.

THE NEXT STEP

Let's put the vehicle into your hands.

We propose a short fleet demonstration with your operations team to review the Tiggo Cross, discuss BCI's current fleet requirements and understand the preferred ownership structure.

Following that discussion, CMH Westrand can prepare a formal fleet quotation based on the agreed vehicle specification, quantity, livery requirements and ownership route.

There is no obligation at this stage.
